PROFILE

Full-stack developer who designs, builds and operates products in production. Built TUMARKET, a multi-tenant SaaS running on PostgreSQL with row-level security, subscription billing and payment webhooks. Comfortable across the whole stack in TypeScript — from database policies to accessible interfaces.

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript, SQL, HTML, CSS
- Frontend:** React 19, Next.js (App Router), Tailwind CSS, Motion
- Backend & data:** PostgreSQL, Supabase, Server Actions, REST APIs, Zod
- Auth & security:** Supabase Auth, OAuth (Google/Facebook/Apple), Row-Level Security
- Integrations:** MercadoPago (checkout and webhooks), Resend, cron jobs
- Tooling:** Git, GitHub, Vercel, ESLint, Prettier, Claude Code
- Practices:** Database migrations, multi-tenancy, WCAG accessibility, responsive design

EXPERIENCE

Founder & Full-Stack Developer — DACARMA [month/year] — Present
Independent studio. Sole developer on every product below.

- Built and operate **TUMARKET**, a multi-tenant SaaS for grocery stores: online storefront, POS with cash closing, inventory with barcode scanning, order picking and sales reporting. Live with [N] stores, 400+ products and real orders.
- Designed the PostgreSQL schema across 9 tables with **row-level security on every table and 73 versioned migrations**, isolating each store's data, images and reports by database policy rather than application logic.
- Delivered **MercadoPago subscriptions end to end** — checkout, webhook, trial period, expiry, monthly and annual plans — plus a cron endpoint that notifies stores before their plan lapses.
- Integrated **Supabase Auth with Google, Facebook and Apple sign-in**, email confirmation and reserved-route handling.
- Built **DCM ACCESS**, a bilingual brokerage marketplace with an in-house CRM (leads, opportunities, deals, commissions, providers), using Next.js route groups and a locale segment so the public site and CRM share one codebase.
- Migrated **dacarma.co** off a hosted page builder into a Next.js codebase, reproducing the original design exactly while moving the contact form to an owned API route with server-side validation.

SELECTED PROJECTS

- TUMARKET — tumarket.co**
Multi-tenant SaaS for neighbourhood grocery stores. Next.js 15 · React 19 · TypeScript · Tailwind CSS · Supabase (PostgreSQL 17) · MercadoPago · ZXing. 121 TypeScript files, 73 migrations.
- DCM ACCESS — dcmxaccess.vercel.app**
Bilingual brokerage marketplace with a custom CRM. Next.js 16 · React 19 · TypeScript · Tailwind CSS · Zod · Motion.
- dacarma.co — dacarma.co**
Personal portfolio built from scratch. Next.js 16 · Self-hosted fonts · Contrast verified against WCAG AA · Contact form on a Resend-backed API route.
